A high-contrast, black and white photograph showing the silhouettes of two feet, one slightly behind and to the right of the other, as if they are being held up or examined. The background is a light grey, and the feet are dark, creating a strong visual impact.

MANUFACTURER OF **ORTHOPEDIC INSOLES**

www.kingmed.pl

We guarantee the highest quality hand made
products **from certified materials**

ABOUT US

KINGMED is a family company specializing in the production of orthopedic insoles. Since 1993, we have been operating not only on the Polish market but also on the European one. We work, among others, with countries such as Germany, Belgium, the United Kingdom, and the Netherlands.

We offer the client a wide range of designs among orthopedic insoles. Descriptions of individual products or diseases can also be found on our website.

For the production of our products we use only proven and certified materials, which guarantees the highest quality of purchased insoles to the client.

Our primary goal is to increase the quality of life of people with dysfunctions of the locomotor system by providing more and more new orthopedic solutions.

WE ARE GUIDED BY THE MOTTO: YOUR SATISFACTION, OUR SUCCESS!

All products meet the requirements of the Medical Devices Act, have the CE mark and the Declaration of Conformity with European standards Directive 93/42/EEC, moreover, they have been registered in the Office for Registration of Medicinal Products, Medical Devices, and Biocides.

INSOLES ALSO IN CHILDREN'S VERSIONS

PU - DIABETIC

The material absorbs excessive pressure relieving sensitive areas on the foot.

MULTIFORM

A filling material used both as the inner layer (middle) of the insole and as the top layer.

THERMOPLASTIC STIFFENER

Insole stiffening and profiling material reflecting the physiological profile of the foot.

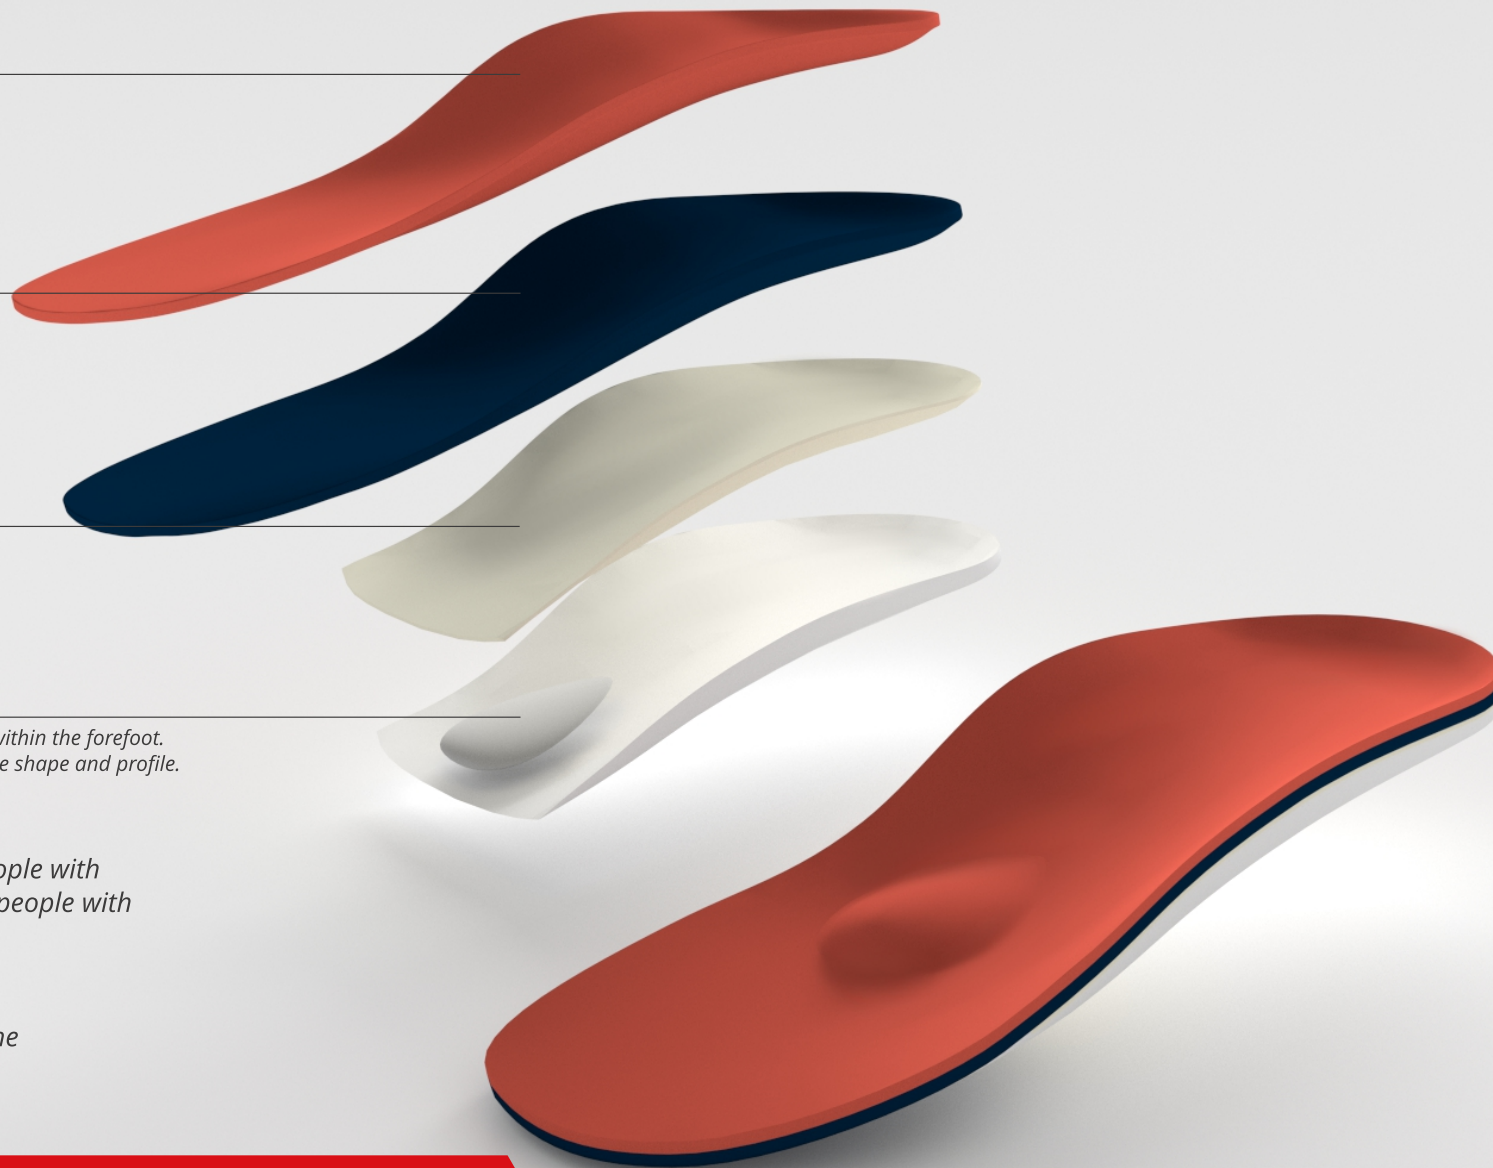

METATARSAL ARCH SUPPORT AND SUPERFORM

*Metatarsal arch support - restores the proper distribution of loads within the forefoot.
Superform - the bottom part of the insole additionally maintains the shape and profile.*

This insole model is especially recommended for people with so-called diabetic foot syndrome, rheumatism, and people with a sensitive foot.

Available in sizes 35-48

In a version with or without cover, with or without the metatarsal arch support. For both women and men.

THICK MODEL

DIABETIC

PU - DIABETIC

The material absorbs excessive pressure relieving sensitive areas on the foot.

PERFORATED MULTIFORM M.C

A filling material used both as the inner layer (middle) of the insole and as the top layer.

THERMOPLASTIC STIFFENER

Insole stiffening and profiling material reflecting the physiological profile of the foot.

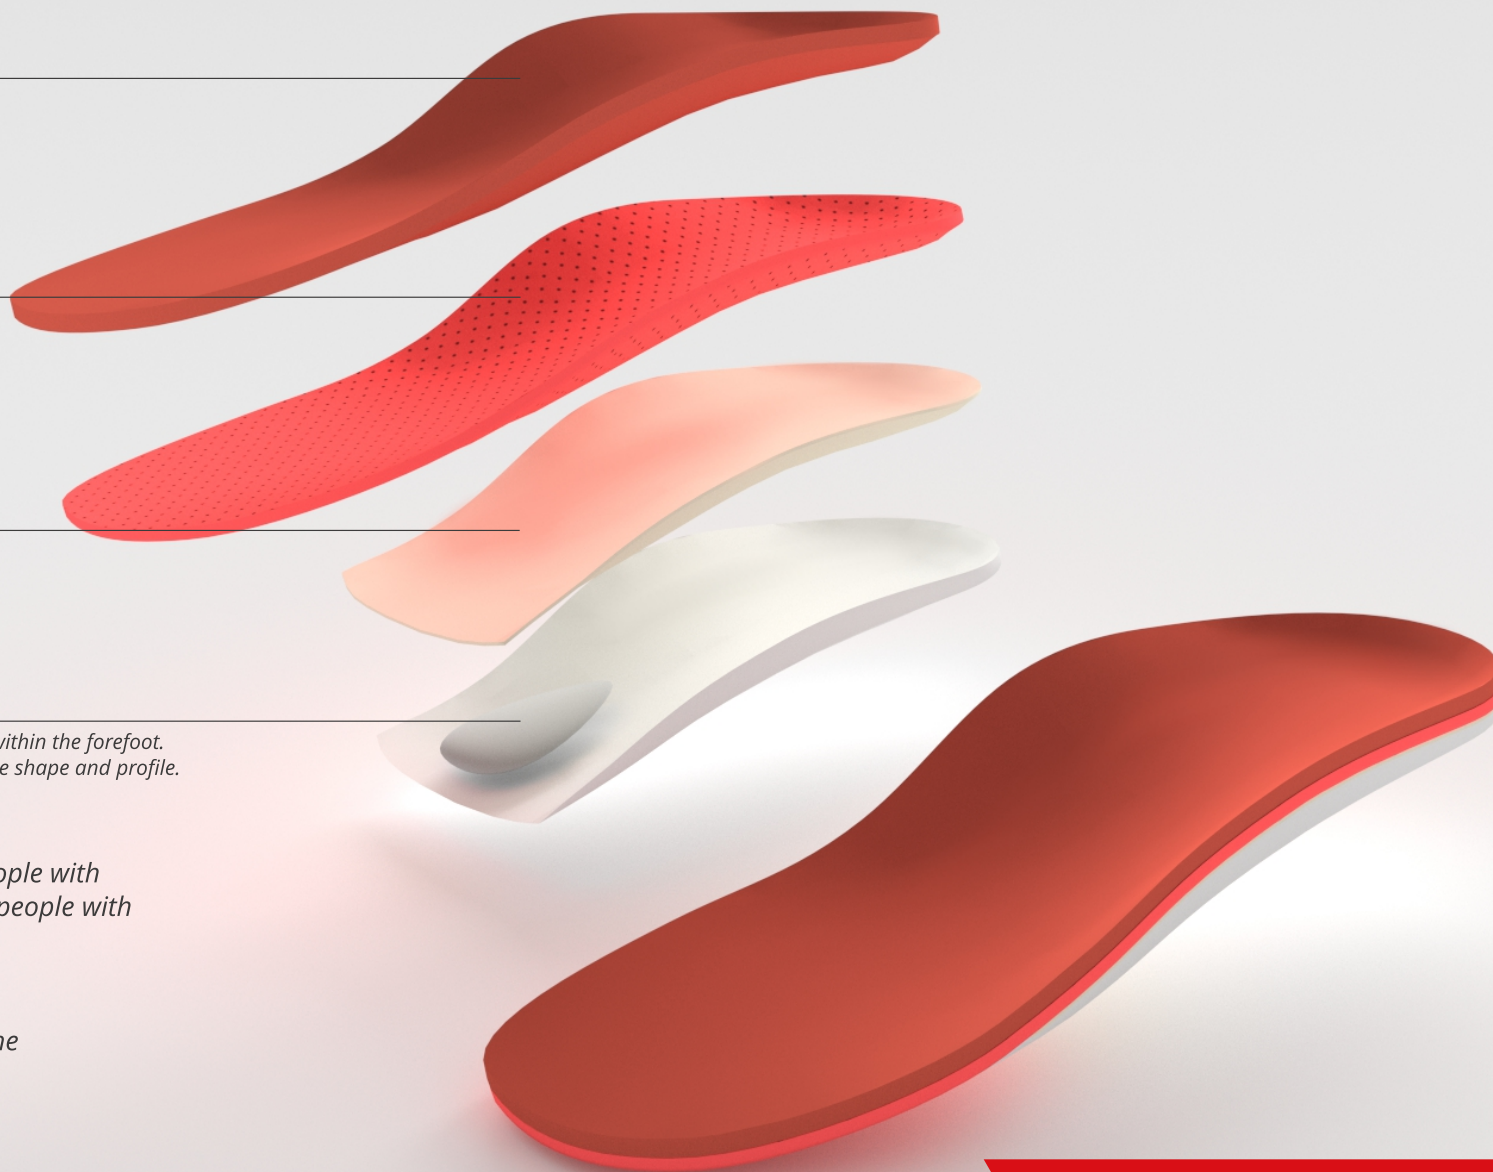

METATARSAL ARCH SUPPORT AND SUPERFORM

*Metatarsal arch support - restores the proper distribution of loads within the forefoot.
Superform - the bottom part of the insole additionally maintains the shape and profile.*

This insole model is especially recommended for people with so-called diabetic foot syndrome, rheumatism, and people with a sensitive foot.

Available in sizes 35-48

In a version with or without cover, with or without the metatarsal arch support. For both women and men.

COVER - NATURAL KIDSKIN

It is characterized by flexibility, softness, durability, and comfort of use. Naturally tanned, plant extracts.

PU - DIABETIC

Available in sizes 35-48

In a version with or without cover, with or without the metatarsal arch support. For both women and men.

COVERING

Microfibre - is characterized by exceptional softness.

METATARSAL ARCH SUPPORT AND EF WHITE 0.8 mm

Metatarsal arch support - restores the proper distribution of loads within the forefoot. EF WHITE 0.8 mm - highly elastic material, additionally maintains the shape and profile.

THERMOPLASTIC STIFFENER

The stiffening material and the appropriate shape of the profiled insole ensure the highest possible stability.

CARBON FIBER *(carbonized fiber)*

Their highly organised structure gives high strength.

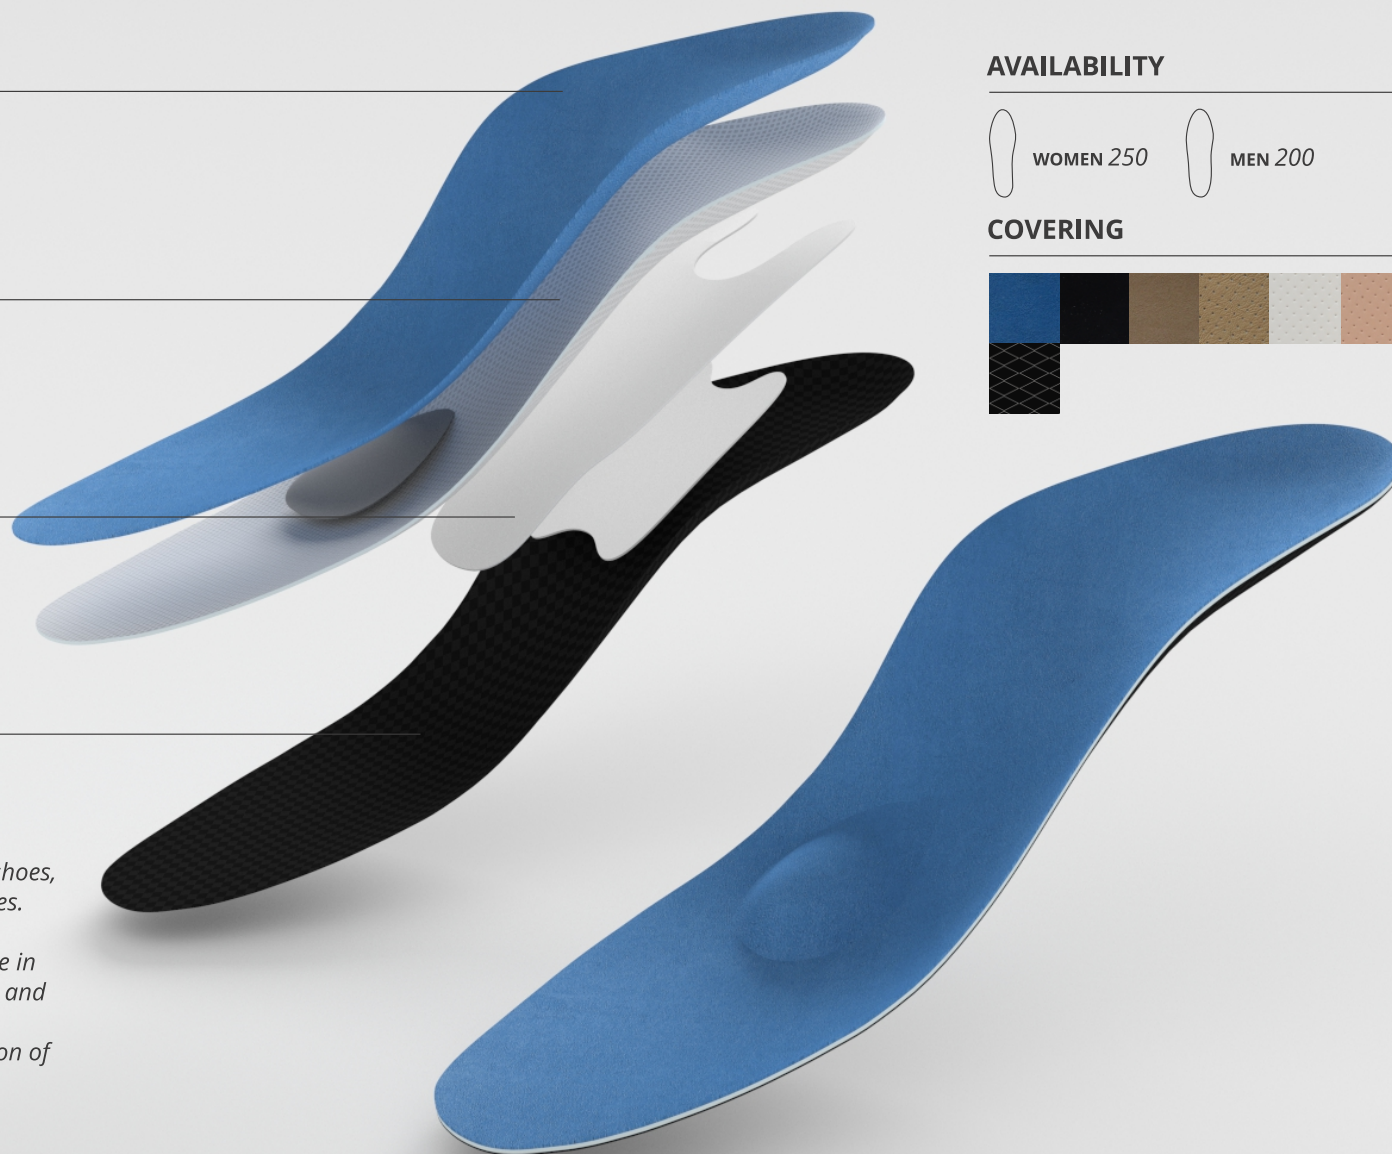

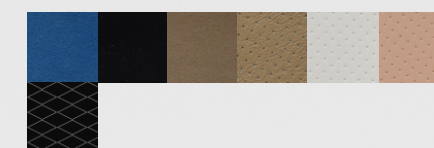

The LWF insole is narrow, ultra-thin, light and highly flexible. The technology makes it possible to use a shoe insert for all types of shoes, shoes with high heels, boat shoes, and light or elegant men's shoes.

Available in sizes 35-48. In the version with a covering - microfibre in different colors, perforated dynaform, natural perforated kidskin and SILBER coating - thanks to the use of a silver thread, it has antibacterial and antifungal properties and prevents the formation of unpleasant odors. Available with or without a metatarsal arch support.
